Digital Footprint Report

Subject identifier: **johndoe**

Prepared for	Example Legal LLP
Engagement	eng-001cee7bf7
Status	FINAL
Date	2026-10-04
Analyst	Demo Analyst
Tool	social-analyzer (node app.js, fast mode)

1. Summary

A fast-mode public-profile sweep was run for **johndoe** against the selected sites (github reddit twitter). **1** profile(s) detected, **0** inconclusive, **3** unreachable.

Confidence band	Count	Meaning
High (≥90)	1	Strong page-level match
Medium (50–89)	0	Needs corroboration
Low (<50)	0	Weak signal

2. Detected profiles

#	Profile	Rate	Band	Page title
1	https://github.com/johndoe	%100.00	High	johndoe · GitHub

3. Inconclusive / unreachable

Site	Outcome
https://mobile.twitter.com/johndoe	unreachable / failed
https://reddit.com/user/johndoe	unreachable / failed
https://twittercommunity.com/u/johndoe	unreachable / failed

4. Method & limitations

• Source: publicly reachable pages only; no authentication, no private data, no account access.

• The rate is social-analyzer's heuristic score (0–100). It means a matching page exists — not that one person owns every account.

• Username reuse by unrelated people is common; medium/low bands require human corroboration.

• Fast (HTTP) mode was used; JavaScript-only sites may show as inconclusive or failed.

• Point-in-time snapshot captured 2026-10-04T14:47:14+00:00.

5. Use restrictions

Provided for the lawful purpose stated in the engagement record. Not for harassment, discrimination, or regulated consumer-reporting / employment decisions without the required legal basis and notices.
